Post Harvest Process of Fruits and Vegetables

Kav-Systems Ltd is a world-leading Group in post-harvest treatments of fruit and vegetables, with over 28 years of experience in the implementation of the most sophisticated crops preservation techniques.

Our commitment goes beyond the sale of processing lines and machinery. We also offer professional advice in various fields, such as diseases and pathologies caused by pathogen agents, by the application of authorized products for post-harvest treatments for different varieties of fruit and vegetables.

Degreening process and agents, as well as systems and treatments for cold storage of fruit and vegetables are key issues in our client's success.

We provide to our customers world wide, both the know-how and technical assistance, in order to extend the shelf life of fruit and vegetables and improve their quality and presentation to reach the well paying markets.

Our range of products includes as well as processing line and machinery, treating agents as-like: waxes, fungicides, detergents, disinfectants, etc. We are constantly introducing new products that meet the highest sanitary standards so that our customers can obtain quality fruit and vegetables.

.....
Kav-Systems Ltd designs, produces and assembles sorting and packing equipment for a wide range of fruit and vegetables. Our systems reduce conditioning costs to their bare minimum and maintain the quality of the produce, so that they reach the end consumer in perfect condition.

We supply the most modern machinery, to meet any specific requirements and guarantee gentle fruit handling. Our supply includes automatic box and bin dumpers, washing and disinfecting applicators, drying systems, as well as the most efficient mechanical and electronic graders, bulk weighing systems and fillers, automatic pattern packing machines, auxiliary accessories and internal transport equipment which allow fully automatic procedures.

Kav-Systems Ltd supplies the required know-how and training for the implementation of the most modern fruit and vegetable process procedures. Our consulting service includes supply of know-how and training of local personnel at the following post harvest activities:

- Post-harvest preservation methods.
